

## BluePrint Automation, Inc.

Chesterfield County, Virginia

**Blueprint Automation, Inc.** is a Dutch manufacturer of packaging products including the design, assembly and finishing of equipment used to package bagged goods.

BluePrint Automation, Inc. is a Dutch manufacturer of automated equipment used to package bagged goods. Completed in 1997, this single story, 40,000 SF manufacturing/office facility has an unobstructed view of Swift Creek and the Appomattox River in the Appomattox Industrial Center in Chesterfield County, Virginia. McKinney and Company provided site selection assistance and full-service design and construction management.

McKinney's construction testing division performed Construction Quality Assurance (CQA) and Construction Quality Control (CQC) for various activities throughout the entire construction process. This included soil, concrete, and structural steel testing and observation services.

The facility was built with flexibility in mind, allowing the company to relocate production equipment and stored materials with ease to and allow for a future building expansion.
