

**Universal Leaf Tobacco Co.**  
Nash County, North Carolina

McKinney and Company performed construction material testing consultation with quality assurance for mixed designs, in addition to overall project and budget control. The range of services provided includes post-tension work and structural framing to produce a concrete slab-on-grade floor which consisted of partially conventional concrete, and pre-cast concrete existing walls.

The site required extensive earthwork along with structural fills for a building pad to host a 1.2 million SF warehouse / manufacturing facility. Project cost was \$360,000.
